-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The claim for benefit under 35 U.S.C. 120 of application Ser. No. 09/860,916 is in error. 09/860,916 is entitled "Apparatus for the Display of Embedded Information," and the subject matter of this application is not related in any discernable manner to the subject matter of the instant application, namely a tool bit drive shaft connection.

Specification

The disclosure is objected to because the first paragraph of the specification under the title "Related Applications" is incomplete, i.e. certain related application serial numbers have been left blank. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3731

Claims 1-3, 5, 6, 8, 9, and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Steiner et al (U.S. Pat. No. 5,499,984). Figs. 1-10 of Steiner et al show a flexible surgical reamer having all the limitations as recited in the above listed claims, including: a super-elastic tubular member 30 defining a passageway 32; a "fitting member" (defined generally as the end portion of the tubular member 30 having the male connector 35), the fitting member defining a shape presenting a first mating interface surface (the outer surface of the male connector 35 together with either "tongue member" 38 or 39); and a tool-bit member 22 presenting a second mating interface surface (the inner surface 24b together with recesses 25 and 26); wherein the tongues 38 and 39 detentively snap into the recesses 25 and 26, aligning the axes of the tubular member and the tool-bit member.

Allowable Subject Matter

Claims 16 and 17 are allowed.

Claims 4, 7, 10, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

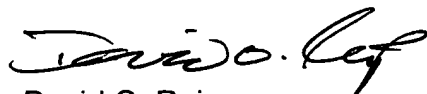

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krause et al, Goble et al, and Matthews et al all show tool bit connecting structures similar to the applicant's invention.
